that this company has given to every member of the present Legislature a free pass over its road. We know also that before the late recess said company gave the whole party a free ride and spree to Huntington. We don't mention this fact to complain of it at all (because we be-lieve that a member of the Legislature lieve that a member of the Legislature can accept a-free pass from a railroad company and still be an honest man); but simply to let our people know that the Baltimore and Ohio Railroad is not the only company that does these sort of things, and that some people ought hereafter to keep a little shady on the influence of that company.—Moorefield Advertiser.

For two years past the body with politic has been drifting with the current of State troubles and hardships, and meckly bore the hatcul and extreme opposition of its enemies. It now stands near the maelstrom of political ruin, and it remains to be seen whether the strong in get tide of public opinion will carry the State to perdition or not. But it is to be hoped that all is for the best, and time yet may inguished shall smart meanness and injustice shall smart prove that meanness and injustice shall not supercede the true and beautiful."

Dr. Loomis' Aerial Telegraph. Dr. L. C. Loomis, formerly President of the Wheeling Female College, now a resident of Washington City, has a theory of electric telegraphy by means of an upper stratum of air instead of by wire, and has lately secured the passage of a and has lately secured the passage of a standard from the feelected of Canas, 6th ward, Centre Wheeling, Monday evening at 3 o'clock. Friends of the family are inby the President, incorporating a company to test the merits of his theory. Concerning the scheme, the New York Jour-

nal of Commerce says:

a laugh among the unthinking only. An clettrician, wise in his own conceit, might prove, with the few facts at his command, that connecting wires cannot be dispensed that connecting wires cannot be dispensed with in telegraphing, but even at the moment he thought his demonstration most complete, Dr. Loomis might be sending nessages and receiving them through the air and across the Atlantic. We will not record ourselves as disbelievers in the Aerial Telegraph, but wait meekly and see what the Doctor will do with his brilliant idea now that both houses of Congress have passed a bill incorporating a company for him. Congressmen at least gress have passed a bill incorporating a company for him. Congressmen at least do not think him wholly visionary; and it is taid that the President will sign the bill; all of which is some evidence that air telegraphy has another side than the ridiculous one. The company receive no money from the government and ask none. We like that, to begin with. As we understand the Loomis plan, it is something to this effect, and readers are cautioned not to laugh too bolsterously at it, as to this effect, and readers are cautioned not to laugh too bofisterously at it, as also not to believe in it till demonstrated. The inventor proposes to build a very tall tower on the highest peak of the Rocky Mountains. A mast, also very tall, will stand on this tower; and an apparatus for "collecting electricity" will top the whole. From the loftiest peak of the Alps, will rise another year tall tower and ditto mast, with the loftiest peak of the Alps, will the another very tall tower and ditto mast, with its coronal electrical affair. At these skyplereing heights, Dr. Loomis contends that he will reach a stratum of air loaded up with electricity; and we cannot say that he will not. Then establishing his ground wire connections, the same as in ordinary telegraphs, he feels confident

that he can send messages between the mast tops, the electrified stratum of air making the circuit complete. The in-ventor claims to have proved the feasility of this grand scheme on a small scale We are told that from two of the spurs of the Blue Ridge Mountains, twenty miles part, he sent up kites, using small cop-er wire instead of packthread. Then, making the ground connections, and arranging his instruments, he completed the electric circuit between the two station and telegraphed from one to the other There have been vague reports in circu ation from time to time, of successfu telegraphing through the sir; but this is the first instance of a claim being put forth which has carried weight enough to gain the favor, if not the confidence, or

Consumption, Decay and Death.

Member of the Royal College of Burgeons, Losdon, graduate from one of the most eminent College in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philadelphis, and elsewhere, has effected some of the most astonishing caree ever known. Many troubled with ringing in the head and cars when salsen, great nervouness, being alarmed at sudden sounds, bashinness, with frequent blushing, attended some times with derangement of mind, were curdimmediately.

TAKE PARTICULAR NOTICE. Dr. J. addresses all those who have injured themselves by improper indulgence and solinary habits, which rain both body and mind, unathi-them for either business, study, society or mar-

them for eather demanders, and melancholy of riage.

These are some of the sad and melancholy of fects produced by early hablis of youth, vir. Weakness of the Back. and Limbs. Thousands of porsons of all ages can now judge what is the cause of their declining healts, losing their vigor, becoming weak, pale, ne-vous and emaciated, having a singular appea-ance about the eyes, cough and symptoms of Consumption. onsumption. YOUNG MEN

YOUNG MEN
Who have injured themselves by a certain practice indulged in when alone, a habit, frequenty learned from evil companions or at school, the effects of which are nightly felt, even when aslees, and if not cured renders marriage impossible, and destroys both mind and body, should apply immediately.
What a pity that a young man, the hope of his country, the darling of his parents, should be snatched from all prospects and enjoyments of life by the consequences of deviating from the path of nature and indulging in a cestain secret habit. Such persons must, before contemplating

MARRHAGE.

MARRIAGE, reflect that a sound mind and body are the most necessary requisites to promote commbial happluess. Indeed, without these the joursey through life becomes a weary pligrimage; the
prospect hourly darkens to the view; the mind
becomes shadowed with despair and falled with
the melancholy reflection that the happiness of
another becomes blighted with our own.

DISKASE OF IMPRIDENCE.

When the misguided and impredent votary of pleasure finds he has imbled the seeds of this painful disease, it too often happens that an ill-timed sense of shame or dread-of diseavery deters him from applying to those who, from edecation and respectability, can alone befried him, delaying till the constitutional symptoms of this horrid disease make their appearance such as alcorated sore throat, diseased note, not unrail pains in the head and limbs, dimness of sight, deafness, nodes on the shin boxes and arms, blotches on the head, face and artmentics, progressing with frightful rapidity, till at last he paisted of the month or the boxes of the north object of commiscration, till death puts a period to his dreadful sufferings by sending him to "That Undiscovered County from whence no traveler returns."

It is a melancholy fact that thousands fall victims to this terrible disease, owing to the neaklifulness of ignorant pretenders, who, by the use of that DEADLY POTRON, MERCHAY, applied to the constitution, and make the residue of life missable. DISEASES OF IMPRUDENCE.
